Target Package: template

Target equation
(ca + car + ct + v + avp) + (tac + tqs + p + m)

Criticalities and vulnerabilities	**Enemy TTPs**
ca = critical assets car = critical areas ct = critical times v = vulnerabilities avp = avenues of approach	tac = tactics tqs = techniques p = procedures m = motivation

Sector:

A critical assets
1
2
3

B critical areas
1
  a
  b
2
  a
3
  a

C critical times
1
2
3

D vulnerabilities (for at least the top 3 criticalities)
1
2
3

E avenues of approach
1
  a
2
  b

F attacks (potential attackers/attack types)
1
2
3

Security Controls (cissp)

1 Deterrence (boundary restrictions, don't look like a target, security projection/visibility)
 a
 b

2 Denial (traditional controls, doors, locks, barriers)
 a
 b

3 Detection (sensors, alarms)
 a
 b

4 Delay
 a
 b
